— DESIGN SYSTEM

Brand & Identity

The complete system governing how Paperplane looks, feels, and communicates — logo, colour, typography, components, motion, and voice.

01 LOGO · 02 COLOUR · 03 TYPE · 04 COMPONENTS · 05 MOTION · 06 VOICE · 07 ASSETS

01 — LOGO

Logo & mark

Lockup, mark, wordmark. Wordmark only when the mark always appears with the wordmark in primary applications. Minimum: 16px mark, 120px wordmark width.

Ivory #F5F4ED on Ink #1F1F1F or dark, #1F1F1F on ivory, #1F1F1F on Ivory

Paperplane | Paperplane | Paperplane

16px Tab, Icon | Sidebar, Collapsed | Loading, Activation | Empty, Onboarding | Error, Offline Offline, Lost

DO NOT

Stretch or skew — The mark is a perfect square.

Recolour — Blue, white, or ink only.

Alter the mark — Use only as provided.

Change casing — Always: Paperplane.

02 — COLOR

One accent, one warm neutral ramp, four semantic colours. Blue is the single decision colour — it appears only where action is required or information is active.

Tones are hue-tinted, never neutral. Ivory, not white. Ink, not black. Warm tints, never cool. Accent is reserved.

PRIMARY ACCENT

Paperplane Blue

#2563EB

Warning — #F59E0B · #FEF7EB — Waiting, pending, flag
Info — #2563EB · #EFF7FF — Consultation, selected

03 — TYPOGRAPHY

Type system

Geist for UI, Geist Mono for all data — vitals, IDs, timers, amounts. No other typefaces, ever.

Optical corrections at small sizes make Geist Mono comfortable for dense tables. Tabular numbers are required for any numeric column.

Geist

ABCDEFGHIJKLMNOPQRSTUVWXYZ

Weights used — 300 · 400 · 500 · 600 · 700 · 900
Pair — Geist Mono (data only)

```
// Mono — IDs, timers, amounts
const patient = {
  id: "PT-1042",
  name: "Arun Kapoor",
  fees: "₹1,00",
  wait: "12h 04m",
  visit: 42,
  phone: "+91-2020-847",
}
```

04 — COMPONENTS

Component library

Every element is defined once and applied identically across every screen. The consultation flow and the billing view use the same classes with zero exceptions.

Single source of truth. No one-off overrides. Every component exists in one place — if a screen needs it, it is in the library. Don't copy, import.

BUTTONS — Primary · Complete & bill · Default · Cancel · Danger · Small primary · + Add patient · Skip 4h · Panel

STATUS PILLS — Urgent · Waiting · In progress · Done · Upcoming

BADGES — Paid · Due · Partial · Pending

KPI CARDS — WAITING 6 · Patients in 20 · IN PROGRESS 1 · 1 of 10 free · PENDING DUES ₹4.8k · 4 invoices · COLLECTION RATE 94% · 47% to target today

FORM INPUTS — Default: Search patients... · Focus: Arun Kapoor · Error: Invalid dosage

TABLE

TOKEN	PATIENT	DOCTOR	STATUS
T-42	Arun Kapoor	Cardiology	Urgent
T-43	Priya Sharma	General	Waiting
T-31	Meena Iyer	Pediatrics	In progress

ICONOGRAPHY

05 — SPACING

Spacing & layout

8pt scale, 4pt in dense grids. Layout gutter 24px. Consistent internal padding follows 8pc page-level fidelity: 16–600px rhythms.

Tokens: 2px Hairline · 4px Tight · 8px Base · 12px Comfortable · 16px Default · 24px Section · 32px Card · 40px Wide · 56px Page · 72px Hero

8px — Buttons, inputs, chips
12px — Card, Tags
16px — Sections, cards
24px — Cards, tables
32px — Large surfaces
40px — Modals, drawers

480px — Topbar, stage footer — Mobile · Tablet · Small laptop · Laptop · Desktop
360px — Table row — Mobile · Tablet · Laptop · Desktop
280px — Table row — Laptop · Desktop

06 — MOTION

Functional, not decorative. Every animation confirms an action, signals a state change, or guides attention. Nothing moves just to look alive.

Prefer a quick, quiet transition. If it takes longer than 300ms, it should be doing work that matters. Respect prefers-reduced-motion.

Ease out — Entrance · Exit · Hover · Tap
cubic-bezier(0.0, 0, 0.2, 1)
Entering fluids in, models appearing, drawers sliding.

Ease in-out — Layout · Resize · Reorder · Tab · Toggle
cubic-bezier(0.4, 0, 0.2, 1)
Layout movements, Bento collapse, tab motion, size changes.

Linear — Loading · Progress · Ticker
Continuous processes. Timer, scrolling ticker, progress fill.

80ms	Micro-interactions — hover state, checkbox, focus ring	ease-out
150ms	Fast — ease fade, pill slide change, row highlight	ease-out
200ms	Standard — sidebar collapse, panel expand, accordion	ease-in-out
340ms	Deliberate — stage transition, mobile drawer	ease-in-out

07 — VOICE

Voice & tone

Paperplane speaks like a senior clinical colleague — direct, confident, precise. The interface is used under time pressure. Every word must earn its place.

This voice is: fast, assuming, trusted, professional. Clinical shorthand is welcome. Clinical jargon is not. Never: cute, apologetic, hedging, marketing, filler, exclamations.

Precise over vague
Use exact values. "Missed Amoxicillin x2" not "missed medication multiple times". Numbers, not adjectives.

Action over description
"Capturing symptoms" not "Is intelligently extracting". The UI describes what is happening; not what the AI is doing.

Brief sentences
One idea per sentence. Consultation stages have 5–7 word subtitles. If you need more words, the concept is unclear.

No exclamation marks
Exclamation marks in a clinical tool signal alarm or over-enthusiasm. Neither is appropriate. Period. Never.

WRITE
"Capturing symptoms"
Precise present tense. The doctor knows what's happening.

NOT THIS
"Is listening and intelligently extracting your patient's symptoms in real-time!"
Verbose, promotional, explains the obvious.

WRITE
"Select a clinical direction. One decision. Details come after."
Short. Commands. Respects the doctor's time.

NOT THIS
"Ok! AI has analysed the patient's symptoms and is ready to assist with clinical assessment."
Self-congratulatory, hedging, asks to reach the action.

WRITE
"Missed Amoxicillin x2 this week (travel to Delhi) — Flag"
Data-forward. The finding leads. No classification fillers.

NOT THIS
"Warning! Patient has missed their medication multiple times this week!"
Exclamations, vague quantity, alarm without precision.

08 — IN CONTEXT

Application

The complete shell — sidebar, topbar, content — as a single unified surface. One design language, zero exceptions between modules and the consultation flow.
