

HOMEOX CLINICAL POLICIES & DIAGNOSIS GUIDELINES

Official Clinical Reference Document for Patient Triage & Support Training

1. General Clinic Information

Clinic Name: HomeoX Wellness & Research Clinic

Business Hours:

- Monday to Friday: 9:00 AM - 6:00 PM
- Saturday: 10:00 AM - 2:00 PM
- Sunday: CLOSED

Consultation Fee Structure:

- First Consultation Check-up (New Case Intake): Rs. 500
- Subsequent Follow-up Visits (Within 30 Days): Rs. 300
- Tele-Consultation / Online Video Call: Rs. 400

2. Homeopathic Case Taking & Diagnosis

Homeopathy relies on individualization and a holistic understanding of the patient. When taking cases, our clinical staff and assistants evaluate patients based on the following key metrics:

Understanding Patient Thermals (Thermal Status):

- Chilly Patient:** Individuals who are highly sensitive to cold weather, draft, and lower temperatures. They prefer warm drinks, heavy clothing, and wrapping up. Common chilly remedies include Arsenicum Album, Hepar Sulph, and Silicea.
- Hot Patient:** Individuals who are highly sensitive to heat, warm rooms, and sun exposure. They prefer cold drinks, open air, and lighter clothing. Common hot remedies include Apis Mellifica, Pulsatilla, and Sulphur.

Intake Checklist:

- Chief Complaints (with exact location, sensation, modality, and concomitant factors).
- Modalities (what makes the pain or symptoms better or worse—e.g., heat, cold, rest, movement).
- Mental Generals (anger, anxiety, grief, fear, cognitive responses, and sleep dreams).
- Physical Generals (appetite, thirst levels, perspiration, food cravings/aversions).

3. Standard Remedial Protocols for Common Diseases

We use specific homeopathic therapeutics as primary remedies for common acute and chronic complaints in our clinic:

A. Allergic Rhinitis (Common Cold / Nasal Allergy)

- Arsenicum Album:** Suitable for patients with burning, thin watery nasal discharge that excoriates the upper lip. Symptoms are better by heat application and hot drinks, worse in cold, dry air. Highly anxious patients.
- Allium Cepa:** Recommended for profuse, acrid nasal discharge (sneezing) accompanied by bland, non-irritating lachrymation (watery eyes). Symptoms worse in a warm room, significantly better in open, cool air.
- Sabadilla:** Indicated for spasmodic, continuous sneezing fits, nasal itching, and red runny eyes. Extremely sensitive to flower odors and cold air.

B. Chronic Gastritis & Acidity

- Nux Vomica:** For patients with sedentary lifestyles, high stress levels, and over-indulgence in spicy foods or coffee. Characterized by ineffectual urging for stool, sour burps, and stomach pain 1-2 hours after eating.
- Lycopodium:** Indicated for sour taste in mouth, massive bloating, gas, and flatulence. Pain is worst between 4:00 PM and 8:00 PM. Patient craves warm food and sweets.
- Pulsatilla:** Ideal for patients with complete thirstlessness (dry mouth but no desire to drink). Pain is worse in warm rooms, better with slow walking in fresh open air. Highly emotional/mild disposition.

4. Emergency Triage & Escalation Policy

Our clinic does NOT treat critical medical emergencies. The following rules are mandatory:

CRITICAL EMERGENCY POLICY:

- HomeoX does not handle acute life-threatening situations (e.g., severe chest pain, sudden paralysis, heavy bleeding, unconsciousness, severe difficulty breathing).
- Triage Action: Patients presenting these symptoms must immediately be advised to visit the nearest Tertiary Care Hospital or call local emergency medical services (dial 102 or 108).

Human Agent Escalation Guidelines:

- If a patient asks custom questions regarding an advanced dosage plan, asks to reschedule surgery, or has a query not answered by this document, the AI assistant will transfer the call/chat to our clinic support staff immediately.
- System marks conversation status to "pending", highlighting it in red on our Team Inbox.
